### Agency Description:

Cornerstone Rehab is a small, family-centered agency owned by a pediatric physical therapist with more than 20 years of experience working with families and children with special needs. Our First Steps services include PT, OT, Speech, DT, nutrition and assistive technology services. We employ therapists with a variety of specialty skills and certifications including sensory integration, feeding, NDT and hippotherapy. We have therapists who specialize in autism, genetic and sensory processing disorders, CP, and feeding issues.

With therapy services for children birth through high school, families who choose to start at Cornerstone can continue to participate in programs specifically designed for their children. There is no need to seek new providers after a child's third birthday! After children graduate from First Steps, Cornerstone provides on-going services in a variety of settings including home, child care, or our custom built, family friendly clinic. We have preschool programs which allow children who need to continue with therapy the opportunity to do so in a small, medically-based, child-centered classroom setting while having fun with friends! Families seeking hippotherapy services may want to check out our wonderful therapy horses at [havendellfarm.com](http://havendellfarm.com). Additionally, we offer a variety of fun and recreational opportunities including gymnastics, swimming lessons and adapted sports.

Please feel free to contact our office if you would like to talk to a therapist about your child's individual needs or any of our special programs.
