Agency Description: TTLC prides itself in offering families the highest standard of care in a family friendly manner. **TTLC's 60 therapists**, have extensive experience working with children and families with diverse diagnosis/conditions. This experience is enhanced with clinicians who have furthered their skills through continuing education, specialized training and advanced degrees. Our compassionate and caring staff is comprised of many parents; some with children who also participated in the First Steps program. Our multidisciplinary agency offers a "continuum of care" for children ages 0-6. In addition to First Steps services we can assist your family with transition options beyond First Steps. These options may include insurance or private paid therapies or preschool placement. TTLC offers families a unique preschool option in our 6,000 sq ft facility. Our preschool staff assists a child's gross motor skills in our motor room, targets fine motor skills in our sensory and art rooms, and enhances a child's cognitive and communication skills in our preschool classrooms.
